

Spray Tanning Release Form

Please read, understand and sign the following:

DHA is listed in the Food, Drug, and Cosmetic Act as a color additive for use in imparting color to the human body. However, its use in cosmetics - including sunless "tanning" products- is restricted to external application. According to CFR, "externally applied" cosmetics are those "applied only to external parts of the body and not to the lips or any body surface covered by mucus membrane" (21 CFR 70.3v).

DHA reacts with the skin's amino acids resulting in a "tan" similar to that of the sun. The darker you can tan naturally, the darker you can tan with a spray tan. Like most cosmetics, avoid exposure to the lips, eyes, and other parts of the body covered with a mucous membrane. This should be accomplished by following the technician's breathing instructions as to avoid inhaling or ingesting the sunless product.

Your spray tan should last 5-10 days depending on your skin type and how well you take care of your sunless tan. It's very important to keep your skin moisturized after your spray tan, avoiding long baths or showers and hot tubs. Salt water exposure or a chlorinated pool can also shorten the life of your spray tan.

Be advised there may be a small percentage of individuals whose skin does not react favorably to spray tanning. Some medications such as birth control pills, hormone replacement medications, or antibiotics may alter your tan. Please consult with your technician if you have any questions or concerns.

Following the spray tan session, please avoid: tight clothes, excessive perspiring, leather seats, and do not shower for 6-8 hours.

All ingredients in the product used in this service are intended for cosmetic use and generally regarded as safe. There are, however, occasions where individuals may be allergic to one or more ingredients in the spray tan solution. If this occurs, shower and discontinue use. If you have a severe reaction, contact a physician. You may ask to see the ingredients prior to application.

It is important to understand and acknowledge that preparing your skin prior to your session and following after care instructions is the client's responsibility. The preparation and aftercare can make or break the final result.

BE ADVISED, we do NOT recommend being sprayed for photographic sessions, modeling assignments, weddings, etc unless you have had a trial spray tan with us.

WARNING — This product does NOT contain sunscreen and does not protect against sunburn. Repeated exposure of unprotected skin may increase the risk of skin aging, skin cancer, and other harmful effects to your skin even if you do not burn.

I have read the contents of this consent form carefully and state that I am not aware of any medical conditions, allergies or other reasons that would prohibit me from sunless tanning. I have been given adequate instructions for the proper use of the sunless application, understand the risks involved, and use it at my own risk. I hereby agree to release the owners, operators and manufacturers from any damages that I might incur due to the use of this salon. I have been advised to discontinue use if any reaction occurs.

I have read and completely understand this consent form
